Cease and Desist Order (CDO) No. R5-2003-0125 was adopted on 5 September 2003 in response to groundwater quality degradation beneath the Land Application Areas. The CDO required the Discharger to perform studies and design a wastewater system that would cease the continuing groundwater degradation. The studies and Report of Waste Discharge were submitted and a revised Waste Discharge Requirements Order for the facility was adopted by the Central Valley Regional Water Board on 24 April 2009. The work items required by the CDO have been completed and the CDO is no longer necessary.
